Provincial Hospital
Klagenfurt (Austria)

Following its recent renovation, the provincial hospital of Klagenfurt (Austria) emerged as Austria's largest specialist hospital and one of Europe's most advanced healthcare centres.

The high quality standards at the hospital extend far beyond first-rate medical care. Providing a pleasant and comfortable environment for patients, staff and visitors alike is also a top priority. The same high standards apply when it comes to managing the hospital's parking facilities. The new parking management infrastructure now provides four parking areas offering a total of 1,800 spaces. SKIDATA equipment was chosen to ensure smooth, efficient parking in close proximity to the main buildings.

Provincial Hospital
Klagenfurt (Austria)

Project Details

Installation date	July 2005
Operated by	APCOA Parking Austria AG
Attended Pay Stations	1
Automatic Payment Machines	5
Entrance	4 + 6 extra Columns for staff
Exit Columns	4 + 6 extra Columns for staff
Parking spaces (total)	1,800
System	APT 450
Data carriers	Barcode ticket, mag stripe card, Mifare, Keycard

The parking facilities at the Klagenfurt provincial hospital are networked with other facilities operated by APCOA Austria. This configuration allows for easy, convenient and cost saving administration of the available parking areas.

At the entrance to the parking facilities, visitors and patients receive a barcode ticket or magnetic stripe card; to pay the parking fee, they can either use one of the pay-on-foot machines on the premises, which accept both cash and credit cards. Payment can also be made by credit card at at the exit gate. Staff at the hospital can take advantage of an additional, exclusive service: using their contactless Mifarebased staff permit, which gives them access to the various sections on the premises, they can pass the entrance and exit gates without even having to touch the gate terminals.

Special Feature

- Networked with other parking facilities operated by APCOA Austria
- Centralised car park management via SKIDATA Main Control Unit
- Parking permits for staff: integration of Mifare-based data carriers into the SKIDATA system
- Central clearing and administration via Main Administration Unit
- Remote system control via Remote Workstations
